Flashpoints Towards Big Changes

When DC's ***Flashpoint*** launches next month, readers will be confronted with a very different DC Universe—a world in which most of the familiar DC heroes have never existed, and the only person who remembers the way things used to be is Barry Allen. And that makes him the only person with the slightest possibility of restoring things to the way they were.

Furthermore, since all former continuity is wiped out in order to pave the way for this five-part miniseries, there is no other comic that must be read to make sense of the limited series. In fact, readers don't have to have any knowledge of the old DCU to enjoy this series.

Even better, readers who come to the DCU as a result of ***Flashpoint*** will find that the storyline has ramifications beyond this miniseries. So new readers are getting in on the ground floor of something very big, with lasting impact on the DC Universe.

As Johns explained to newsarama.com's *Vaneta Rogers*, ***Flashpoint*** isn't a new concept; instead, it's something that Johns has been playing with for quite a while. "I came up with the idea behind it when I was fleshing out Barry Allen a long time ago. [Artist] *Andy [Kubert]* and I have been talking about it and working on it for a long time. Andy's already cruising through issue #4... As of right now, I'm about to start the script for issue #5, so I'll be on the last issue before the first issue even hits."

While the miniseries is the only required reading to make sense of the storyline, readers who'd like to know more about this revamped universe will have plenty of opportunity. Johns' ***Flashpoint*** will spawn sixteen miniseries and a variety of oneshots that explore the ***Flashpoint*** world. How did these tie-ins come about?

"We had a meeting a while ago, last year, and everybody came in," Johns said. "And we talked to everyone and I pitched out the series, and what it was all about. The whole story from beginning to end. And we talked about it. A lot of people had ideas about things to do. That's how a lot of the guys got involved.

"I talked to *Brian [Azzarello]* in detail about stuff. He's one of my absolute favorite writers in comics, and one of my favorite people in comics. I think he's brilliant. I was psyched when he wanted to get involved, especially with him and Eduardo. ***100 Bullets*** is one of the greatest series of the modern age.

"And it wasn't just him. I mean, *Jeff Lemire*, *Scott Snyder*, and all these other talented writers wanted to get involved. I just feel fortunate with the quality we have with the writing and art on the stuff around ***Flashpoint***.

"A lot of it was ideas they had about exploring the world beyond what I could tell in the pages of ***Flashpoint***. My mini-series really centers on a core group of characters in this world, and a lot of the other ones come in and out. And then there were so many glimpses of other characters that could be explored, and there was an opportunity to look at what changed them and why. And I think that was what was enticing to so many people.

"The tie-ins aren't just, like, 'look, so-and-so is this way.' It's exploring 'how did they get there, and why?' That's the idea that drove a lot of the people who are involved. What would happen to make a hero in our universe go this far?"

Is ***Flashpoint*** in essence a time travel story that alters the DC timeline to prevent the development of superheroes? "It's hard to say," Johns replied. "In a way, it is. It really builds off what we've done in both ***The Flash*** and ***Rebirth***, and it comes full circle to that.

"I think this is different than anything that's been done before, because of the way it's told and what we have coming out of it."

While there are many characters who play a role in this event, Johns described ***Flashpoint*** as "a Flash-Batman story."

The only ongoing DC series with links to ***Flashpoint*** will be ***Booster Gold***—and it's only natural that Booster should be involved, since his series also revolves around altered timelines. "That was the one book that I knew would be tied into the miniseries," Johns said. "I knew [***Booster Gold*** creator] *Dan [Jurgens]* was coming back, and I talked to him a lot about this story. It just felt like he's the natural person to have be involved in this, and that his book would just fit right along with it. If you're going to tie in anything, that's the book to tie-in."

Why is Cyborg such a pivotal character in ***Flashpoint***? "Cyborg, much like Aquaman, is one of my favorite characters," Johns explained. "I brought him into ***The Flash*** way back when and I brought him into ***Teen Titans***. I always felt that he was so recognizable and I thought he was such a great character. I just felt like there are a lot more stories to be told about him, and he's a character that I really wanted to work with more. I would love to elevate the character. He's not usually in the center of these events.

"We always see Superman and Batman and now, Green Lantern, and Wonder Woman at the center of these events. So I wanted to have a big DCU event that revolved around Flash, but also bring in some other characters, like Cyborg."

Readers will discover another character will take on a prominent place in the ***Flashpoint*** storyline, but Johns isn't ready to say who that character might be. However, he did confirm that "there's another character that's very obscure who is going to have a bigger role in the Flashpoint mini-series than she's ever had in the DC Universe.

"That was one of my goals. I think it makes it more fun to read. I think it's fun to introduce some of these characters to people who don't really know them. I think it's fun to explore them in totally different way. And it also just shows how capable and powerful these other characters are.

"What I like to do is take characters that I love, characters that I already have a passion for, and concentrate my effort there. Whenever I wrote my top favorite characters down, on the list was some of the top characters, but there were a lot of obscure characters too. I want to share the passion I have for these characters. And I think the only way to elevate characters is to pick the ones you love. Pick the ones you have ideas for, that you have stories for, that you know and have an emotional core for.

"You see why they could be bigger and relatable. You take all that potential that you see and you try to lock it into the story that people are reading. I think that's the real key to getting these characters out there."

Johns describes ***Flashpoint*** as "the most accessible event I've ever done," and with good reason. "There are a lot of new characters in here. This isn't just one of those stories where you take the DC Universe, shake it up, and say, 'This is what happened to so-and-so.' There are a lot of new characters in here as well. So you, as the reader, are in this universe with Flash, meeting all these characters for the very first time. Some of them are brand new. Some of them are characters that you maybe aren't familiar with, who are in a different place. But it's very much a journey where Barry's in the dark as much as the reader.

"I think it's going to be much more accessible than anything else you've seen before as an event. You certainly don't need to read anything before ***Flashpoint #1***, and the mini-series tells you everything you need to know.

"Part of the fun of ***Flashpoint*** is not just to explore this world, but to explore the details of why things went the way they went. The stories behind these characters, and why they went different places."

In spite of rumors to the contrary, ***Flashpoint*** will not lead to a temporary shutdown of the standard DCU or anything like that. "We didn't want to interrupt the flow of the other books," Johns said. "We didn't need to."

In closing, Johns asserted that "I'm really proud of the book. I think it's different than any other event that's been done before. And as more is revealed about ***Flashpoint*** and about where DC is going, it will become clear what this is."
